INFORMATION

Name: Zhongda Li

Phone: +86 18031981669 (Wechat same)

+1 (917) 992-6395

E-mail: zhongda0117@163.com

Zhongda.li@nyu.edu

Address: 303 first Street Apt 405, Jersey City, NJ, 07302

EDUCATION

Bachelor, School of Mathematical Science, Peking University, China, 2022-2026

PhD, Courant Institute School, New York University, USA, 2026-

Course Highlights: Mathematical Analysis I,II,II; Advanced Algebra I,II; Geometry; Algebra I,II; Probability Theory; Fundamentals of Number Theory; Functions of Real Variables; Functions of Complex Variables; Ordinary Differential Equations; Groups and Representations; Elementary Algebraic Geometry; Mathematical Modelling; Algebraic geometry I II; Homological Algebra; Topology; Differential Mainfold

Overall GPA: 3.71/4.0, **Major GPA:** 3.81/4.0

ACADEMIC EXPERIENCES

‘Algebra and Number Theory’ Summer School (jointly organized by CAS and Peking University)

Course Instructors: Yisheng Tian, Yichao Tian, Hang Xue, Bin Zhao, Yihang Zhu Jul. 2025-Aug. 2025

- Studied courses: Automorphic Representation, Abelian Varieties, Introduction to p-adic Hodge Theory, Introduction to Langlands Program.
- Understood the fundamental concepts and related results of automorphic representations, as well as how to obtain automorphic representations from modular forms.
- Studied the theory of Abelian varieties, primarily covering the first three chapters of D. Mumford’s book Abelian Varieties.
- Learned the basics of p-adic Hodge Theory and Landlands Program.
- Learned algebraic groups, weak approximation and other related concepts, laying a foundation for future research in this field.
- Complete a paper *On weak Approximation of Reductive Groups over Higher Dimensional Function Fields* (arXiv. link: <https://arxiv.org/abs/2508.09601v2>), which generalized the earlier works of Harari–Scheiderer–Szamuely (Weak Approximation for Tori over p-adic Function Fields) and Izquierdo (Dualité et principe local–global sur les corps de fonctions) on tori over such function fields, as well as the work of Yisheng Tian (Obstructions to Weak Approximation for Reductive Groups over p-adic Function Fields) on reductive groups over p-adic function fields.

RESEARCH INTERESTS

Algebraic number theory, arithmetic geometry

HONORS & AWARDS

Silver Medal, 36th Chinese Mathematical Olympiad (CMO 2020)

Yuanning Scholarship(2024), Freshman Scholarship(2022)

Peking University Qin Wanshun and Jin Yunhui Scholarship(2024-2025),

The member of Peking University’s Elite Program in Fundamental Mathematics

EXTRACURRICULAR ACTIVITIES

**Peking University Youth League Committee, Department of Academic Science and Creativity
2022-2023**

Head of Integrated Office
